

JOSHUA R. SCOTT

PRODUCT OWNERSHIP & HIGHLIGHTS

- **AI Integration & Solution Architecture:** Expert in designing and deploying end-to-end AI automation workflows, cross-functional NLP/Conversational AI tools, and LLM testing frameworks across enterprise, legal, and life sciences domains.
- **Data-Driven Value Realization:** Proven track record of leveraging data analytics (SQL, Metabase, Power BI) to drive Series A funding (\$2.5M round), optimize internal AI/GPT-4 solutions, and map measurable ROI—including a recent \$125K projected savings initiative.
- **Cross-Functional Leadership:** Skilled in managing complex product roadmaps, authoring PRDs, leading stakeholder workshops, and steering vendor engineering teams to resolve critical platform defects.

EXPERIENCE & PROJECT IMPACTS

AI Integration Specialist

April 2026 - Present

Slipstream IT

- **AI Automation ROI:** Conducted ROI-focused IT service records analysis to quantify a \$125,000 projected savings opportunity across the client portfolio—derived from a \$27/ticket cost baseline and a 2-minute reduction per ticket via auto-categorization—to secure business case approval for Phase 2 AI onboarding.
- **Workflow Architecture & Deployment:** Architected and deployed end-to-end automated workflows across multi-stakeholder life sciences accounts, identifying process deviations from original design specs and driving alignment meetings to resolution prior to production delivery.
- **Integration Engineering:** Researched and proposed an advanced tool integration architecture using native MCP Server Consoles and CData Connect AI, incorporating OAuth/Okta SSO-enforced access controls to enable permission-aware enterprise ticket querying within AI chat interfaces.
- **Platform QA & Vendor Management:** Validated production AI performance by testing real-world data pipelines across multiple life sciences clients; identified, escalated, and tracked critical vendor platform defects (including AI answer suppression and HTML workflow export data loss) through to production fix deployment.
- **Data & Knowledge Frameworks:** Led Phase 0 of the corporate KB Enrichment Program, designing a two-factor diagnostic framework utilizing a new "Saturation Rate" KPI to isolate missing knowledge vs. enrichment quality gaps, establishing the firm's first measurable baseline for AI knowledge performance.

Product & Data Analysis Consultant (AI & Visualization)

Feb 2024 - Present

Elroi.ai / Pillar Consulting/MEL, Inc / Future ProofAI

- **Local Compute Lab Foundations:** Architected and built a dedicated, local AI compute lab utilizing Python, PyTorch, and WSL2 to construct, train, and fine-tune foundational neural networks from absolute scratch, deepening core architectural expertise in large-scale model mechanics.
- Consulted on market analysis and product strategy documentation to drive the development of customized AI automation tools, utilizing Python and custom chatbot architectures (app.py).
- Managed project direction via product roadmapping and PRDs, utilizing Metabase to deliver data-backed user stories and dashboard visualizations that directly drove a \$2.5 million Series A funding round.
- Processed unstructured data into clean, PII-free datasets to surface investor insights within the EdTech space, helping monetize platforms that influence student higher education goals.

Innovation Solutions Analyst

Jan 2021 - July 2023

Troutman Pepper (International Law Firm)

- Constructed over 400 custom client sites, litigation reports, and automated workflows using HTML, CSS, and JavaScript, driving a \$90 million revenue increase and earning the firm a Fast Company Best Places for Innovators nomination.
- Served on the internal AI Task Force to develop MVPs, POCs, and quality assurance testing protocols for 'Project Athena', enabling secure firm-wide utilization of GPT-4 capabilities.
- Won 1st place in the Thompson Reuters firm-wide Hackathon by developing an automated client intake survey, scaling the data analyst and developer team from 4 to 20 peers within 2 years.
- Increased client product satisfaction by 18% on live production sites within 2 quarters by creating data visualization platforms informing attorneys of real-time legal changes.

Product Owner & UI/UX Design Lead

June 2019 - April 2025

GoVo (Go Vote)

- Founded a nonpartisan data-visualization nonprofit app to bridge voter gaps, integrating the GPT-4 API to build an innovative, personalized voting plan feature.
- Designed a user-centric UI/UX layout using Adobe XD and InVision, achieving a 92% user satisfaction rate during prototype testing across diverse demographics.

TECHNICAL INFRASTRUCTURE ROLES

Troutman Pepper / Global Atlantic Financial / Univ. of Pennsylvania

2016 - 2021

- **IT System Engineer / Specialist:** Managed large-scale infrastructure environments (up to 1,000+ users), writing custom Excel macro scripts for rapid data organization, building Active Directory training programs for executive staff, and providing high-profile technical support for university leadership.

CERTIFICATIONS & EDUCATION

- **IBM AI Product Manager** - IBM & SkillUp Education (2024)
- **NVIDIA AI Foundations Certification**
- **B.A. in Psychology and Social Sciences (Minor in Pre-Med)** - Penn State University

Technical Toolkit: Python, PyTorch, WSL2, SQL, JavaScript, HTML/CSS, Bootstrap, Metabase, Power BI, Tableau, Jira, Adobe XD, OpenAI API, Aisera, ServiceNow, Active Directory.
